Mina Isaac
Frontend Software Entwickler
München, Deutschland

mina.isaac.1993@gmail.com
(+49) 01512-3685-175

Arbeitserlaubnis: EU Blaue Karte (Germany)
Sprachkenntnisse: English: C1, **Deutsch**: A2 / B1 in progress

Frontend-orientierter Full-Stack-Software-Entwickler mit 8+ Jahren Erfahrung in der Entwicklung skalierbarer Web- und Mobilanwendungen. Expertise in modernen Frontend- und Backend-Architekturen, KI-gestützter Entwicklung, LLM-Integration, Agentic Workflows sowie KI-Produktentwicklung. Fokus auf hochperformante, nutzerzentrierte Lösungen mit starkem Wert auf UX, Qualität und Developer Experience.

PORTFOLIO

Top Skills

React.js / Next.js: 8+ years developing responsive, high-performance web applications, reusable component libraries, and modern frontend architectures.

Typescript: 8+ years building scalable and maintainable applications with strong typing, modern JavaScript patterns, and large-scale frontend architectures.

HTML5 + CSS3: 8+ years building responsive, accessible, and high-performance user interfaces with a strong focus on user experience and modern web standards.

Node.js - Express.js: 3+ years developing REST APIs, backend services, and microservice architectures for production web applications.

PostgreSQL: 3+ years designing relational databases, optimizing query performance, and managing data persistence for scalable applications.

Docker: 3+ years containerizing applications, streamlining development workflows, and supporting deployment across multiple environments.

Python / Django: 2+ years building secure, database-driven web applications and REST APIs with Python Django and Django REST Framework.

React-Native: 3 years building visually appealing screens, end-to-end mobile features.

Work Experience

Uniscon GmbH – Munich, Germany
Senior Software Entwickler 07/2025 **–** present

- Architected and implemented an AI-assisted document workflow for Microsoft Word and Excel using Office.js, React, and TypeScript, integrating contextual AI capabilities directly into the Office environment supporting both user-selected text and full-document context

- Engineered the asynchronous request lifecycle, including UI state management, retries, error boundaries, and graceful failure handling for long-running AI operations.

- Implemented context-aware response rendering and source highlighting, connecting AI-generated answers to relevant document sections and providing users with a transparent, low-friction workflow without leaving Word or Excel.

- Resolved a long-standing development bottleneck by making Outlook project testable locally, eliminating the need for live test deployments and drastically improving the development feedback loop.

Core Technologies: React.js, Redux, Tailwind, Node.js, MSW, Office.js, TanStack Query, TanStack Router, Playwright, Docker

---

CHECK24 GmbH – Munich, Germany
Full-stack software engineer 12/2022 **–** 06/2025

- Designed and implemented the E-Feedback feature end to end. The feature is used *by 500k+* customers allowing them to submit reviews about services they bought

- Identified and eliminated a key development bottleneck by containerizing a ~15-service Node.js/TypeScript backend and creating modular Docker Compose setups, enabling independent local development and testing across both frontend and backend teams without reliance on live services.

- Introduced an AI-assisted development workflow across 22 repositories, where coding agents implement tickets, verify changes against the containerized Docker Compose environment, and open PRs with test results, cutting average PR cycle time by 60% for a team of 9 engineers.

Core Technologies: React.js, Next.js, Zustand, GraphQL, Python, Django, RabbitMQ, Express.js MongoDB, microservices, Docker, AWS, PostgreSQL, SEO

Cliniserve GmbH – Munich, Germany
Full-Stack software Entwickler 10/2021 – 12/2022

- Designed and implemented a microservice integrating Cliniserve with Aachen University Hospital's SAP HR system, *which was key to securing them as a VIP customer*.
- Optimized database queries on backend improving backend *response time by 75%*.
- Developed visually appealing react native screens and end to end features for Cliniserve's mobile app.

Core Technologies: React.js, Next.js, React-Native/Expo, Redux Toolkit, Typescript, Node.js, NestJS, Express.js, MongoDB, Material-UI, jest, Cypress, npm-scripts

---

Wordbee – Cairo, Egypt
Front-End Web Entwickler 06/2020 – 09/2021

- Implemented Redux middleware to centralize and streamline API authentication logic, improving code clarity and developer productivity.
- Built the company's fastest and most efficient CAT editor, focused on performance and lightweight design.
- Applied DOM virtualization to a React table component, *boosting scroll performance by over 85%* when handling large datasets.

Core Technologies: React.js, Redux, MobX, Typescript, Sass, Material-UI, Cypress.js

---

Spade Studio – Cairo, Egypt
Front-End Web Developer 02/2017 – 05/2020

- Built a secure donation platform for Misr El-Khier NGO, enabling seamless user interaction.
- Implemented complex financial validation logic to ensure data accuracy and regulatory compliance.

Core Technologies: WordPress, React.js, Redux, Typescript

Education

Bachelor in Physics, Ain-Shams University – Cairo, Egypt 09/2006 – 06/2011
